VALUE OF WORKS

R 35 million

DATE

November 2010 to September 2011

PROJECT DESCRIPTION

The project comprises construction of New Grade R Facilities in Seven Primary Schools in Mopani District, Limpopo. In each school the work entailed construction of new 3 classroom block, 5 seater enviroloo toilet block, fencing around grade R complex, 4 classroom block, and electrical, civil and structural works.

Our role included planning, design and construction supervision of civil & structural works, and Project Management of the multi-disciplinary team.

Substructure:

Conducted geotechnical investigation, construction of platforms, reinforced strip foundations and concrete floor slabs

Superstructure :

The structures are traditional buildings clad with one brick wall, timber roof covered with chromadek roof sheeting

Storm water is catered for by concrete aprons, v drains and stone pitching
