VALUE OF WORKS

R 66 Million

DATE

JUNE 2009 - CURRENT

PROJECT DESCRIPTION

The project is for the implementation of a one-way system within the Hatfield precinct. The proposed system consists of an east-west one way pair (Burnette Street and Park Street via Arcadia Street) and a north-south one-way pair (festival Street and Hilda Street). The scope requires the relocation of services, widening of existing roads and new traffic signals, road marking and road signage.

SALIENT FEATURES

- Accommodation of traffic
- Bitumen treated base
- (BTB)
- Stress Absorbing
- Membrane Interlayer
- (SAMI)
- Relocation of services
- Protection of Jacaranda trees
